Creative Portfolio Narrative Planner MCP

Turn your scattered creative work into a cohesive professional story.

Creative Portfolio Narrative Planner MCP helps you organize your creative history into a strategic professional identity. Instead of just dumping files into a folder, you use this MCP to build a high-level blueprint, verify that you actually own the rights to publish your work, write targeted captions, and run a final checklist before you go live.

The connectivity layer between AI and the world's software.

Vinkius sits between AI and every application. All communication passes through Vinkius Cloud via the Model Context Protocol (MCP) — with governance, observability, and security at every layer.

Your AI Connections Run Through Vinkius Cloud

The world's largest
managed MCP catalog

Vinkius is the connectivity layer where AI connects to the software your business already runs. We handle the hosting, the security, the credentials, the uptime — you get agents that actually do things.

We operate the world's largest managed MCP catalog. Major SaaS platforms, CRMs, databases, and cloud providers — running, monitored, production-ready. This MCP server is hosted and maintained by the Vinkius Cloud for AI Agents.

The agent doesn't manage credentials, doesn't manage uptime, doesn't manage security. Vinkius does.

— Architecture principle

Four Pillars of the Vinkius Runtime

01 — Security by design

Credentials stay encrypted at rest via AES-256. The AI agent never touches raw keys — they're injected into a sandboxed V8 isolate at runtime. Actions are logged, and connections have an emergency kill switch.

03 — Deterministic observability

Eight immutable metrics per endpoint: request volume, p95 latency, error rate, active connections, cost attribution. A live payload feed logs every tool call with mutation detection.

02 — Built on MCP Fusion

This MCP server was built with **MCP Fusion**, the open-source framework (Apache 2.0) that powers the entire Vinkius catalog. Schema-as-firewall strips undeclared fields, compiled PII redaction runs at zero overhead, and cryptographic lockfiles produce git-diffable audit trails.

04 — Autonomous operations

Servers are deployed, monitored, and patched autonomously. New capabilities and security patches ship weekly. Zero-downtime deployments ensure continuous availability across all managed MCP servers.

AES-256

Encryption at rest

Ed25519

PKI vault signatures

24h TTL

Ephemeral session keys

V8 Isolate

Sandboxed execution

One Token. Instant Access.

Every MCP server on Vinkius is accessed through a **Connection Token**. Tokens are generated in the cloud dashboard and produce a unique MCP endpoint URL. Paste this URL into any MCP-compatible client — no SDK required.

A single token can serve **multiple AI clients simultaneously**, or you can issue separate tokens per client for granular access control. Each token tracks its own request count, last activity timestamp, and can be individually enabled or revoked.

Security Is the Architecture

Security in Vinkius is not a feature — it's the foundation of the runtime. The gateway enforces multiple independent protection layers between AI agents and third-party APIs.

01 — Ed25519 PKI Vault

Every workspace has an Ed25519 Master Key. Session keys are generated ephemerally (24h TTL) and signed by the Master Key. Credentials never leave the vault boundary.

02 — V8 Isolate Sandboxing

Tool code runs inside isolated-vm V8 isolates with 64 MB memory caps and per-request timeouts. No filesystem access, no network access except through the SSRF-guarded fetch bridge.

03 — SSRF Guard

All outbound HTTP requests are DNS-resolved and validated before execution. Private IP ranges (10.x, 172.16-31.x, 192.168.x, AWS metadata 169.254.x) are blocked at the network layer.

05 — Cryptographic Audit Trail

Every request is signed into a SHA-256 hash chain with Ed25519 signatures. Events form a tamper-proof, SIEM-exportable forensic record.

04 — DLP & PII Redaction

A ResponseGuard pipeline intercepts every tool response. Configurable redaction patterns strip sensitive fields (emails, SSNs, card numbers) before data reaches the AI agent.

06 — Honeypot Trap System

Phantom credentials are injected into isolated environments. If a honeypot is used outside Vinkius infrastructure, the server is quarantined instantly.

Emergency Kill Switch

EU AI Act Art. 14(1)
Compliant

The kill switch is an **emergency halt** mechanism — not a simple toggle. When triggered, it executes three actions atomically:

01 — Server deactivated

The MCP server is immediately taken offline across the entire cluster.

02 — All tokens revoked

Every connection token is invalidated. Total lockout — reconnection blocked until new tokens are issued.

03 — WebSocket connections killed

Active connections terminated via Redis pubsub broadcast. Propagates to every runtime node in the cluster.

Full Visibility. Zero Guesswork.

The Vinkius cloud dashboard includes a full MCP Governance suite — real-time analytics and security controls for production AI operations.

Control Plane

KPI dashboard with request volume, latency, success rate, token consumption, and AI-generated operational briefings.

FinOps

Cost tracking per tool, payload compression savings, budget optimization signals, and consumption trends.

Firewall & DLP

PII redaction activity, sensitive data protection counters, and security event timeline.

Agent Activity

Which AI clients are connecting, how often, and what they're doing — real-time session tracking.

Tool Health

Slowest and most error-prone tools, with actionable root-cause insights and performance baselines.

Incident Log

Error trends, failure rates, status-code breakdowns, and forensic audit trail access.

Creative Portfolio Narrative Planner MCP

4 tools available

Cloud-hosted on Vinkius

You have the work, but you don't have the story. This MCP changes that by giving your AI client the strategic framework needed to build a professional portfolio. Rather than just describing what you did, you can use this tool to structure your career trajectory. You can group projects into thematic chapters that prove your expertise to specific employers or clients.

It handles the heavy lifting of organization and compliance. You can check if your current publication strategy respects the legal constraints of your past projects, ensuring you don't run into copyright issues. Once the strategy is set, your agent can draft specific captions tailored to your target audience, whether you're pitching to a high-end gallery or a tech startup. It's about moving from a collection of files to a deliberate professional narrative that proves you're ready for the next step in your career.

Core Capabilities

01 — Strategic Blueprinting

Your agent uses this to organize your creative history into a professional narrative.

02 — Legal Compliance Checks

The AI checks your work metadata against your publication plans to ensure you have the rights to show it.

03 — Audience-Specific Copywriting

Your agent generates caption directions based on the specific tone and audience you want to reach.

04 — Pre-Launch Verification

The AI runs a final checklist to confirm everything is ready before you go public.

One Click on Vinkius — From Prompt to Execution

Available at vinkius.com/en/ai-agent-connect/creative-portfolio-narrative-planner — connect your AI agent in three steps.

01 Connect the MCP to Claude, Cursor, or Windsurf via Vinkius.

02 Provide your project history and career goals to your AI client.

03 Use the planning and rights tools to build your strategy.

04 Generate captions and run the final publication checklist.

You connect the MCP to your preferred AI client and start building your narrative.

Built For

This MCP is built for creative professionals who need to present their work strategically to advance their careers.

Art Directors

They hand off their project history to the AI to build cohesive career narratives.

Photographers

They use the tool to verify rights compliance and write descriptive captions for their series.

Illustrators

They use the tool to tailor their project descriptions to specific gallery or commercial audiences.

What Changes When You Connect

01 Connects your past creative work to your future career goals.

02 Reduces legal risk by checking publication rights.

03 Standardizes the quality of your portfolio captions.

04 Provides a structured way to group projects by theme.

Real-World Applications

Career Advancement

Use the planning tool to structure a portfolio that proves you are ready for a senior-level role.

Rights Management

Verify that you can legally show specific client work on your personal website before you publish it.

Brand Consistency

Ensure all your project captions follow a single, professional tone for a specific target audience.

Final Quality Control

Run a final checklist to make sure no details are missed before launching a new portfolio site.

Patterns to Avoid

Treating it like a simple caption generator

❌ AVOID

You ask the AI to write random descriptions for every photo you've ever taken without any context.

✓ INSTEAD

Start by using `plan_portfolio_narrative` to group your work into logical chapters that prove your specific expertise.

Ignoring legal constraints during planning

❌ AVOID

You decide to post a series of client projects to your website without checking if you actually own the rights.

✓ INSTEAD

Run `validate_rights_compliance` to ensure your publication plan respects the legal limits of your past work.

Skipping the final review process

❌ AVOID

You launch your new portfolio site immediately after the AI writes the text, hoping nothing is missing.

✓ INSTEAD

Use `generate_publication_checklist` to run a final verification before you go public.

The Right Fit

Connect this MCP if you are a creative professional moving into senior roles or specialized niches. Do not connect it if you just need a basic photo editor or a simple file storage solution. The decision depends on whether you need to prove a specific career trajectory through your work.

Creative Portfolio Narrative Planner Tools

These tools turn a disorganized pile of files into a structured professional story. They handle everything from high-level strategy to final legal checks.

#	TOOL	DESCRIPTION
01	generate_publication_checklist	This tool produces a final verification list to ensure your portfolio is ready for public viewing. It acts as a last check before you hit publish.
02	validate_rights_compliance	This tool checks if your planned publication strategy respects the legal constraints of your individual works. It helps you avoid publishing content you don't have the rights to show.
03	plan_portfolio_narrative	This tool generates a high-level strategic blueprint for your professional portfolio. It helps you group your work into logical chapters to prove your expertise.
04	develop_captions	This tool creates specific descriptive tasks and directions for individual work captions. It helps your agent write text that fits the tone of your target audience.

See It in Action

Real prompts you can use once this MCP is connected to your AI agent through Vinkius Cloud.

U Help me plan my portfolio. My goal is to become a Senior Art Director, and I want to show my technical mastery and emotional impact.

To achieve your goal of becoming a Senior Art Director, we will group your works into three chapters: Technical Precision, Emotional Resonance, and Commercial Versatility. This structure will highlight your core strengths while demonstrating your readiness for leadership roles.

U Check if I can publish my recent photography series on my personal website.

Based on the metadata provided, your photography series is under FullOwnership, meaning you are fully compliant to publish it on your personal website.

U I need help writing captions for my new illustration set. The tone should be minimalist and the audience is high-end gallery owners.

For your minimalist illustration set, focus on brevity and negative space. Use keywords like 'essence', 'form', and 'subtlety' to appeal to gallery owners.

Frequently Asked Questions

01 What AI clients can I use with this MCP?

You can use this MCP with any compatible client like Claude, Cursor, Windsurf, or VS Code.

02 Do I need to host the MCP myself?

No. Vinkius hosts and manages the MCP for you. You just connect it once and it's ready to use.

03 How does it help with legal issues?

The `validate_rights_compliance` tool checks your planned publication strategy against the legal constraints of your work to ensure you are compliant.

04 Can it write my portfolio captions?

Yes. The `develop_captions` tool provides specific directions and tasks for your agent to write captions that match your target audience.

05 Is this for web designers or just visual artists?

It is for any creative professional, including art directors, photographers, and illustrators, who needs to present a professional narrative.

06 How do I create a strategic plan for my portfolio?

You can use the `plan_portfolio_narrative` tool by providing your chosen works, career goals, and target audience to generate a cohesive blueprint.

07 Can this tool help with legal compliance?

Yes, the `validate_rights_compliance` tool checks if your publication strategy respects the legal constraints of your individual works.

08 How do I ensure my captions match my brand voice?

The `develop_captions` tool generates specific instructions for writing captions that incorporate your preferred voice and audience profile.
